

## Scott Plantje

I am so excited to start my teaching career with the students and adviser's at the Seven Oaks Met School. The privilege of teaching here is one that I am supremely honoured to have and I aim to make my advisory a great place to be. I feel that students learn best when they can lay hands on and experience what they are learning and intend to bring that to every lesson we have. I have had a lifelong love for science, math, comic books and am generally an all-around nerd.
