Met School Learning Goals

How do I prove it?

Empirical Reasoning

This goal is to think like a scientist: to use empirical evidence and a logical process to make decisions and to evaluate hypotheses.

What idea do I want to test?
What has other research shown?
What is my hypothesis?
How can I test it?
What data do I need to collect?
How will I collect the information?
What will I use as a control in my research?

How good is my information? What are the results of my research? What error do I have?

What conclusions can I draw from my research?

How will I present my results?

How do I measure, compare or represent it?

Quantitative Reasoning

This goal is to think like a mathematician: to understand numbers, to analyze uncertainty, the properties of shapes, and to study how things change over time.

How can I use numbers to evaluate my hypothesis? What numerical information can I collect about this? Can I estimate this quantity? How can I represent this information as a formula/diagram? How can I interpret this formula or graph?

How can I measure its shape or structure?

What trends do I see?

How do I take in and express ideas?

Communication

This goal is to be a great communicator: to understand your audience, to write, read, speak and listen well, and to use technology and artistic expression to communicate.

How can I write about it?
What is the main idea I want to get across (thesis)?
Who is my audience?
What can I read about it?
Who can I listen to about it?
How can I speak about it?
How can technology help me to express it?

How can I express it creatively?

and challenge

themselves with new ideas.

What are other people's perspectives?

Social Reasoning

This goal is to think like an historian or anthropologist: to see diverse perspectives, to understand social issues, to explore ethics, and to look at issues historically.

How do diverse communities view this?
How does this issue affect communities?
Who cares about this? To whom is it important?
What is the history of this?
How has this issue changed over time?

What social systems are in place around this?
What are the ethical questions behind this?

What do I bring to this process?

Personal Qualities

This goal is to demonstrate respect, responsibility, organization, leadership, time management, and to reflect on your abilities and strive for improvement.

How can I demonstrate respect?

How can I empathize more with others?

How can I strengthen my health and well-being?

How can I communicate honestly about this?

How can I be responsible for this?

How can I persevere at this?

How can I better organize my work?

How can I better manage my time?

How can I enhance my community through this?
